St Luke's Health and Safety Policy

Rationale

St Luke's recognises that a safe and healthy working and learning environment is vital for the welfare of students, staff and other community members. We believe that promotion and maintenance of a safe working and learning environment is a responsibility shared by all.

Policy Statement

We acknowledge that Occupational Health and Safety is a statutory requirement and ensuring a safe and healthy environment depends on sound management, vigilant supervision and co-operation of all children and adults.

We are committed to promoting and maintaining a safe and healthy working and learning environment where risk prevention and minimisation strategies are integrated into all school activities.

Values/Principles

We value the safety and well being of all people who use the school's facilities and are committed to promoting and supporting active learning in a safe, secure and caring environment.

We respect and value open communication and encourage everyone to understand their own responsibilities in safeguarding the welfare of all individuals in this community. We believe that if we all work together, we can ensure the continuous improvement of health and safety by:

- Being familiar with all instructions and guidance of safety within the school
- Using common sense at all times to take care and be accountable for our own safety and the safety of others
- Being aware of our own responsibilities in maintaining our physical surroundings to minimise risk and promote safety for all community members.
